

# GROUNDEXPER

DER BESTE METALLDETEKTOR

Ground Exper is the first metal detector in the world to let you see, on the provided tablet PC the shape, metal and depth of your target before you even start digging. Find any kind of buried relics up to 5 meters underground and stop wasting time on junk. It comes in two multilingual versions : Light and Pro.

Save time: do not dig on junk, dig only for valuable relics !

Identify shape, metal and depth before digging

Cell phone or tablet PC are included to easily control your Ground Exper

Easy to use thanks to Bluetooth chipset

Comes in 9 languages: Turkish, Arabic, French, English, Chinese, Russian, Spanish, Bulgarian, German

Even beginners can handle Ground Exper and make quick valuable finds thanks to its automatic ground balance. Its smart notch technology allows you to select only the metals you want to dig on. You may also teach your ever-evolving Ground Exper new alloys to be recognized in your next hunts.

100x100 cm coil for maximum depth inside (200x200&300x300cm also available)

DER BESTE METALLDETEKTOR

**LIGHT**  
VERSION

Ground Exper LIGHT includes 100x100 cm coil for maximum depth up to 5 meters and features USB connectivity, adjustable discrimination on 5 levels and cell phone control protocol. We offer custom versions of our programs depending on the country you're living in and the nature of finds/metal that can be made in your area.

**PRO**  
VERSION

PRO version adds Bluetooth connectivity and two additional waterproof coils (45 and 20cm) that offer more accuracy. It's also controlled by a last generation tablet PC instead of a cell phone. All extra accessories are included: bags, chargers, headphone, harness, telescopic shaft...

Oak Island TV show - Treasure hunting in France and Virgin Islands - Coin shooting in Pakistan - Inca relic search in Peru

20cm waterproof coil

Charger, car charger and USB cable

Headphone

Telescopic shaft

Long-life smart battery

## ABOUT DRS ELECTRONICS

DRS ELECTRONICS was founded in GERMANY in 2012 to bring a new technological approach to the metal detecting market. We offer innovative devices with technologies used for instance in military and industry fields: gradiometer, resistivity measurement units, ground penetrating radars, vlf and pulse detectors...some of our devices even combine all of those !

DRS products are used worldwide. You may learn more about all our range at one of our distributor facility or on our website: [www.drselectronics.eu](http://www.drselectronics.eu)
